EDUCATION

B.E. in Information Technology — August 2023 - May 2026
L.D. College of Engineering, Ahmedabad| CGPA: 9.24 — Gujarat, India

Diploma in Information Technology — August 2020 - May 2023
Government Polytechnic for Girls, Ahmedabad| CGPA: 9.86 — Gujarat, India

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript__

Generative AI: LLMs, RAG, LangChain, LangGraph, FAISS, ChromaDB, Groq, Ollama, Prompt Engineering

Agentic AI & Automation: AI Agents, Tool Calling, MCP (Basic), n8n, Webhooks, Workflow Automation
Web Technologies & Frameworks: HTML, CSS, Angular, Node.js, Django, Flask, FastAPI, Streamlit, REST APIs
Databases: PostgreSQL, MySQL, MongoDB, Vector Databases
Tools & Platforms: Git, GitHub, GitLab, Postman, Swagger, VS Code, Docker (Basic)

WORK EXPERIENCE

Software Engineer — Jan 2026 - Present
Impero IT Services | *Python, AI/ML, LLMs, REST APIs, Automation, Git/GitLab* — Gujarat, India
- Working with Python, AI/ML, LLMs, conversational AI, backend development, REST APIs, databases, and automation while contributing to real-world client projects, debugging, testing, and collaborative Git/GitLab development workflows.

Software Engineer Intern — July 2025
TatvaSoft | *Angular, ASP.NET Core, C#, PostgreSQL, REST APIs, JWT, Swagger* — Gujarat, India
- Developed a full-stack web application using Angular, ASP.NET/.NET and PostgreSQL.
- Implemented JWT-based authentication and role-based authorization for Admin and User roles, with REST APIs, Swagger and BCrypt password hashing.

Software Engineer Intern — Jul 2022 – Apr 2023
Infolabz | *Python, IoT, Sensors, Real-Time Monitoring, Automation* — Gujarat, India
- Developed an IoT-based industrial energy monitoring system using LDR, PIR, IR, ultrasonic and temperature sensors.
- Implemented monitoring and alert mechanisms for energy consumption, idle devices and hazardous conditions, gaining experience in Python, IoT integration and real-time sensor data processing.

PROJECTS

Conversational RAG | *Python, LangChain, LangGraph, FAISS, ChromaDB, Groq, Ollama, Streamlit* 🔗
- Developed an AI-powered multi-source summarization and RAG system that processes PDFs, Word documents, Excel files, text, website URLs, YouTube links, and user-provided text to generate concise, easy-to-understand summaries.
- Implemented chunking , embeddings , FAISS/Chroma vector search , and hybrid retrival for context-aware questions answering across multiple data sources.

AI-Powered Personal Assistant & Workflow Automation | *n8n, LLMs, Google Workspace APIs, Webhooks* 🔗
- Enabled natural-language requests for email retrieval/sending, meeting scheduling, task creation/deletion, note management, and expense tracking.
- Used webhooks, conversational memory, and tool-calling to dynamically select and execute appropriate actions.

Customer Churn Prediction using ANN | *Python, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Streamlit* 🔗
- Developed an Artificial Neural Network (ANN) model to predict customer churn based on demographic, account, and banking-related features using TensorFlow/Keras and Scikit-learn.
- Built an end-to-end prediction application with data preprocessing, categorical encoding, feature scaling, model inference, and a Streamlit-based interface for real-time churn prediction.

Next Word Prediction using LSTM | *Python, TensorFlow, Keras, LSTM, NLP, Streamlit* 🔗
- Developed an LSTM-based deep learning model to predict the next word in a text sequence using TensorFlow/Keras and NLP techniques, trained on textual data.
- Built an interactive application that uses tokenization, sequence processing, and the trained LSTM model to generate real-time next-word predictions from user-provided text.
